## WHAT IS CLAIMED IS:

ľ.

- 1. An engine starter, comprising:
- a recoil device:
- a ring gear operatively rotated with said recoil device;
  - a recoil cover for accommodating said recoil device and said ring gear therein;
- a starter device having pinions engaged with said ring 10 Gear; and
  - a drain mechanism provided on said recoil cover for decoil cover to be discharged by one-touch operation.
- 2. The engine starter according to claim 1, wherein said drain mechanism includes a transparent pipe member attached to said recoil cover and a plug member fitted to said pipe member.
- 3. The engine starter according to claim 1, wherein said recoil cover includes a window for allowing the liquid therein to be visible from outside.
  - 4. The engine starter according to claim 2, wherein said recoil cover includes a window for allowing the liquid therein to be visible from outside.
- 5. The engine starter according to claim 1, wherein
  25 said recoil cover includes a compressed air injection hole
  for introducing compressed air to forcibly discharge the
  liquid inside said recoil cover and a lid member for closing

said compressed air injection hole.

- 6. The engine starter according to claim 2, wherein said recoil cover includes a compressed air injection hole for introducing compressed air to forcibly discharge the liquid inside said recoil cover and a lid member for closing said compressed air injection hole.
- 7. The engine starter according to claim 3, wherein said recoil cover includes a compressed air injection hole for introducing compressed air to forcibly discharge the 10 Hiquid inside said recoil cover and a lid member for closing said compressed air injection hole.
- 8. The engine starter according to claim 4, wherein said recoil cover includes a compressed air injection hole for introducing compressed air to forcibly discharge the liquid inside said recoil cover and a lid member for closing said compressed air injection hole.
